At Greer, we understand that the quality of our product has a direct reflection on the quality of your product. That's why we are committed to a never ending process of improvement and investment to deliver the industry's best strip steel.

To that end, we recently made a number of upgrades and improvements to our 18" 4-high Reversing Mill that will improve both surface cleanliness and Cpk performance.

- *Hydrometer room revamp*
- *New coolant control valve and pump upgrade*
- *New mill drives and associated controls*
- *Refurbished non-contact isotope gauges*
- *New mill control software improves Cpk performance by 15%*

I believe we share a common resolution and commitment to success.

We will never be satisfied with the status quo and will always do whatever is needed to provide you with world class strip and flat wire.

**Sincerely,**

**John R. Raese, President**
